From 8 weeks

Time off Work

2 weeks for sedentary roles

Aftercare

Sports bra for 6-8 weeks

A Breast Augmentation, also known as a 'boob job' involves placing implants in the breasts to increase cup size, correct asymmetry or replace volume lost after pregnancy.

It is the ideal procedure for ladies who are unhappy with the present size of their small breasts. It is sometimes combined with a Breast Uplift (Mastopexy).

It is important that you do your research before having any type of surgery. Check that your Surgeon is registered with BAAPS and BAPRAS for good practice and have at least one thorough consultation where you discuss face to face any questions or concerns you may have before you go ahead. You should be in good physical health, be a non smoker and have support from family and friends whilst you recover.

If you are interested in this type of surgery, then please see our Frequently Asked Questions or don't hesitate to call us on **0161 393 3993**.

We look forward to seeing you and hope you will be delighted with your new image!

What our patients say

"How lucky I am to be treated by Mr Lambe. From the first consultation he made me feel comfortable and confident of the journey that I would be taking."

Linda - West Didsbury

Results

Most women are delighted with their new shape having used the Virtual Reality Breast Visors to ensure their new implants are the ideal size and shape for them.

Women report feeling more feminine after surgery and can buy dresses which fit their top and bottom halves and accentuate their new figure!
