### What our patients say

*"Having Mr Lambe as support and knowing I could contact him at any time before the operation has made the experience a less stressful time."*

Mary, Warrington

### Results

You will look more rested and more youthful in appearance. Many patients report increased self confidence.

Eyelid Surgery is sometimes known as Blepharoplasty.

After surgery on the eyelids you will look fresher and the eyes will look more open and youthful.

These procedures are ideal if you are starting to feel that the upper lids are heavy or that you have started to look hollow and tired around the lower eyes.

If you are interested in this type of surgery, then please see our Frequently Asked Questions or don't hesitate to call us on **0161 393 3993**.

It is important that you do your research before having any type of surgery. Check that your Surgeon is registered with BAAPS and BAPRAS for good practice and have at least one thorough consultation where you discuss face to face any questions or concerns you may have before you go ahead. You should be in good physical health, be a non smoker and have support from family and friends whilst you recover.

**We look forward to seeing you and hope you will be delighted with your new image!**
