Gentle walking only for 1st 2 wks

Time off Work

Full 3 weeks
Mid One week
Mini None

Aftercare

Review one week post op for Full Facelift, Mid Facelift & Mini Facelift

A facelift (Rhytidectomy) is a good way of recreating a youthful appearance by restoring your original face shape and removing "jowls."

There are many variations on the technique and Mr Lambe will be able to advise you on the best variant of the procedure for you.

If you are interested in this type of surgery, then please see our Frequently Asked Questions or don't hesitate to call us on **0161 393 3993**.

It is important that you do your research before having any type of surgery. Check that your Surgeon is registered with BAAPS and BAPRAS for good practice and have at least one thorough consultation where you discuss face to face any questions or concerns you may have before you go ahead. You should be in good physical health, be a non smoker and have support from family and friends whilst you recover.

We look forward to seeing you and hope you will be delighted with your new image!

What our patients say

"The after care has been excellent. Some days I forget I have had it done as everything has been smooth and positive."

Eileen, The Wirral

Results

The results will usually be a more refreshed and youthful face with loss of jowls and sagging skin in the neck. Your options will be discussed at your consultation. The results will vary depending upon your choice of facelift.
